

Pallet Burner

Outdoor Wood Furnace

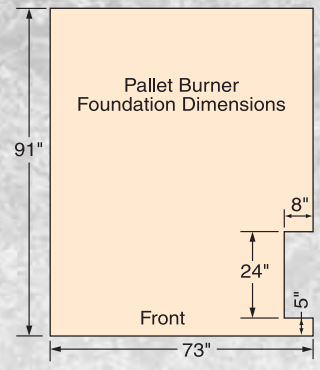

Reduce Waste Recover Heat

- Eliminates expensive disposal costs of scrap wood.
- Efficient heat recovery from disposal of pallets, crating material, wood remnants or cord wood.
- Loads easily with a forklift or by hand.
- Provides high capacity water heating.
- Heats multiple buildings, kilns, greenhouses and swimming pools.
- Works well with existing heating systems.
- Can be located up to 500 feet from buildings.

Pallet Burner Specifications

- Cam Loc® Door54" wide x 50" high
- Water Capacity556 gallons
- Draft ControlPrimary and secondary power draft inducers
- Firebox72" x 66" x 54"
- Steel Thickness3/8", 1/4", 7 gauge steel
- Weight4,880 lbs.
- Chimney8 ft. (extensions available)
